About Egholm

Copy text from www.egholm.eu > [about us](#) > [about Egholm](#)

Built in Denmark for the cities of the world

Since our early beginnings in the nineties, we have delivered utility machines to municipalities, cities, facility management companies and industrial estates all across the world.

Built by craftsmen in Denmark, Egholm machines are in operation in cities and parks all over the world. With special attachments developed for the machines, Egholm machines deliver perfect results no matter the task at hand.

Egholm machines are constructed with a profound respect for craftsmanship and with attention to detail and quality - both for the operator and for those who are going to enjoy the end result of the work done.
